

Are You Ready to Share?

Meet the eShare presentation kit.

“The best presentation system for your meeting room connectivity.”

AV Access eShare W50 works for both in-person meetings and hybrid meetings.

With this model, you can:

- Easily integrate with your speakerphone and webcam to make an all-in-one hybrid meeting system.
- Take advantage of the BYOD and share screens via Miracast, Airplay or a dongle.

Plug and play. No apps. No burden.

“When they work together, screen sharing becomes extremely easy.”

Just feel free to bring your own devices to the meeting, and share your screens through cables, screen mirroring or a dongle in seconds.

No tech or training is needed.

How Does It Work?

AV Access eShare W50 works for:

- huddle room
- small meeting room
- medium-sized conference room

With USB devices connected, eShare W50 is able to handle:

- in-person meeting
- hybrid meeting

✉ [Get a quote](#)

EShare W50 for an in-person meeting.

In a face-to-face meeting, eShare W50 connects personal devices with the main display in the meeting room.

Screens can be shared easily via HDMI or Type-C (up to 4K). In case you are not fond of cables, Screen Mirroring or a dongle is an option too.

EShare W50 for a hybrid meeting.

People attending the meeting, whether in the same room or not, all shall be heard and seen. EShare W50 is ready to incorporate your webcam and speakerphone into a hybrid system.
